Subgrant Abstract:

The primary objective of this grant is to create a “Cyber Café,” a tutorial/homework lounge for Newport and Croydon students. This Cyber Café would provide computer and internet access for homeless and other students who do not have access to these resources on a regular basis. Students from grades 7-12 would be targeted for this project. Tutors would also be available to assist students in meeting the required academic achievements mandated by the district. Newport and Croydon schools have very limited funding and lack after school programs. This program would help improve the academic performance of homeless students, and in turn increase school attendance rates.
